Pay your fee at exit it will be a modern tool for you, because in the new generation the terminal has a software version that does not require you to write down your license plate number, because you will immediately see your license plate number and the amount to be paid.

The parking exit cashless kiosk is a modern and convenient solution designed to streamline the payment process and enhance the overall parking experience. It serves as a self-service terminal located at the exit of parking facilities, allowing users to make payment for their parking without the need for cash or interacting with a staff member.

The cashless kiosk utilizes advanced technology to process payments in real-time, providing instant validation and generating a receipt for the user. It integrates with the parking management system to access the necessary data, including the duration of the parking session and the corresponding fee calculation. This integration ensures accurate billing and minimizes the potential for errors.

Technical data

Housing dimensions (H x W x D)	
Mount type	4 screws on the ground
Housing material	Metal with zinc (additional safe against corrosion)
Weight	80kg
IP Code	IP55
Power supply	220 – 240V, ~3A, 50Hz
Max. power consumption	450w
Regular power consumption	50w
Operating temperature	From -30 C to 40 C (with heater up to -40 C)
Storage temperature	From -40 C to 85 C
Humidity (at 40 °C)	0 – 95% (non-condensing)
Uses ways	first is as a main automatic pay station; second – as an exit terminal for payments at exit directly from a car.
Languages	(Lithuanian, Ukrainian, English) exactly possible add more languages
Intercom	New generation speaker and microphone will allow you to hear the service staff without any additional noise.
Screen	Antivandal 15 inches LCD TFT touchscreen; brightness (up to 1600cd/m2); high contrast; high resolution.
